## System Manual

### Risk warning

Before you begin trading on Real account please carefully consider your investment goals, risk and experience you have. It should be noted that Forex is a leverage based market. It should be remembered that leverage can work both in your advantage and disadvantage as well. Therefore there is high risk of losing a part or all of your financial input placed on your account and because of that you should remember to trade with the amount of money which you can lose without taking any influential financial damage.

- Restart your MT4

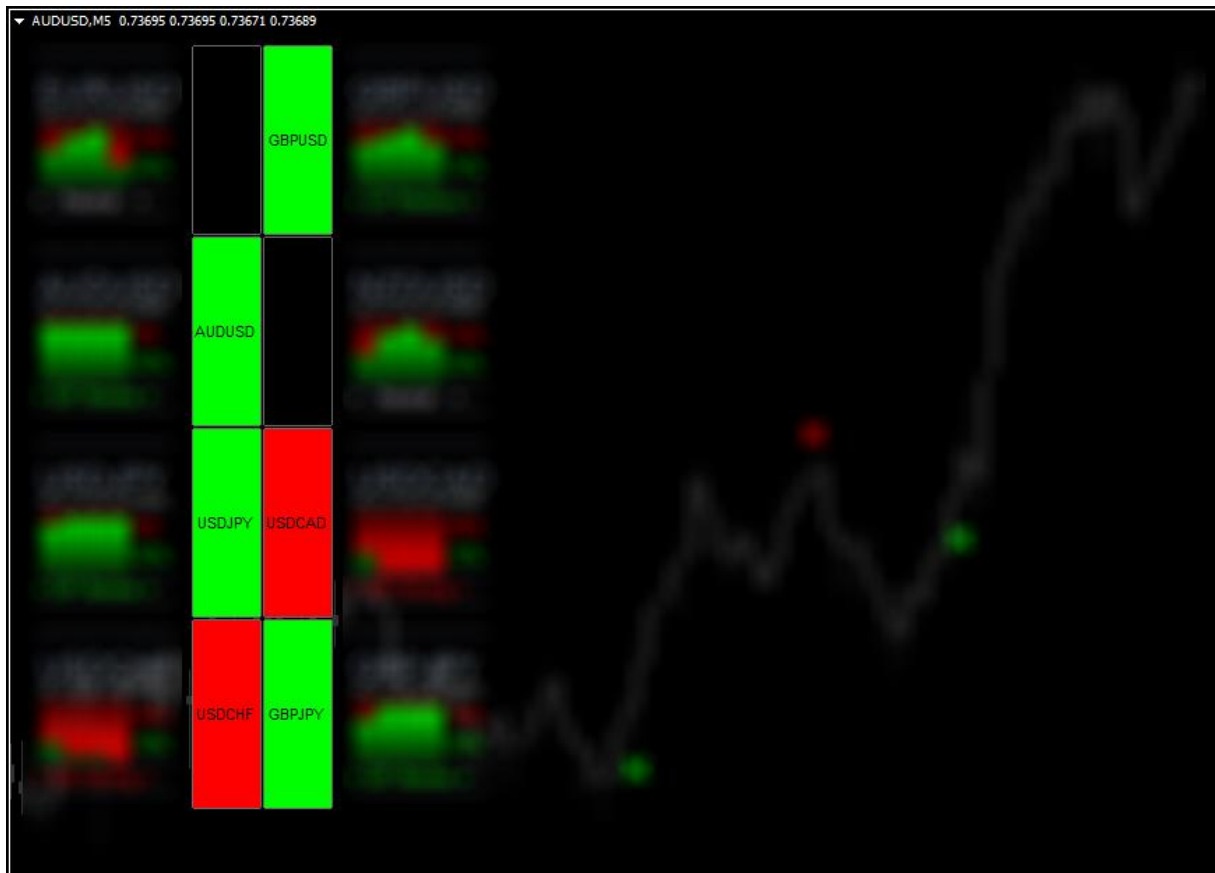

**PLEASE USE THE SYSTEM TEMPLATE TO UPLOAD THE INDICATORS  
ON THE CHART**

**FXTRADER Template:** Provides Faster trend calculations with  
increased risk and profit potential.

**FXTRADER2 Template:** Trend calculations are more conservative.

# SYSTEM INDICATORS

## The Core

The core provides fast trend calculations in easy visual form. The rules are simple:

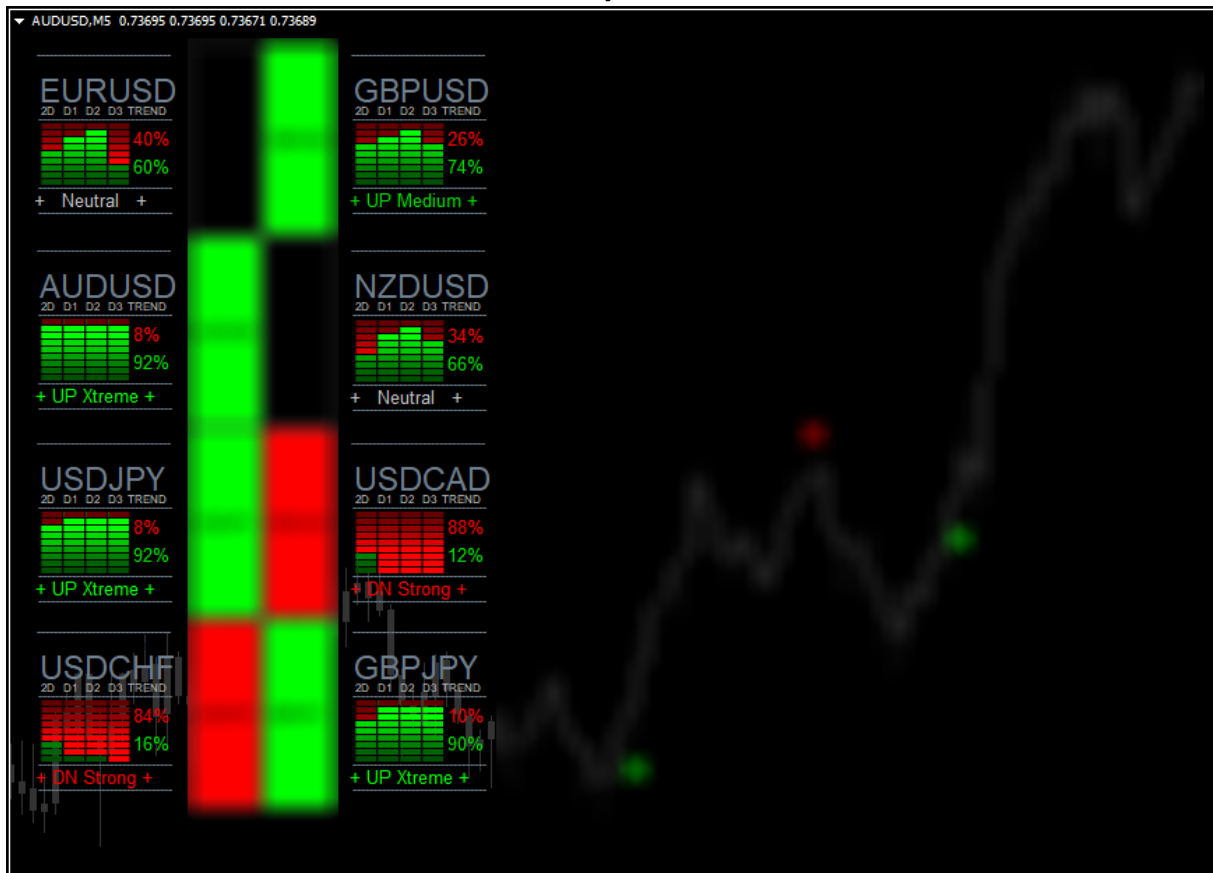

Green color – UP trend confirmed

Red color – DOWN trend confirmed

Black color – no trend/consolidation

## SYSTEM INDICATORS

### Pair Dynamic

The second element of the software are pair dynamic. It provides the momentum data for our pairs.

Momentum values:

UP Extreme – very strong UP trend

UP Strong – strong UP trend

UP Medium – medium UP trend

UP Weak – weak UP trend

Neutral

DOWN Extreme – very strong DOWN trend

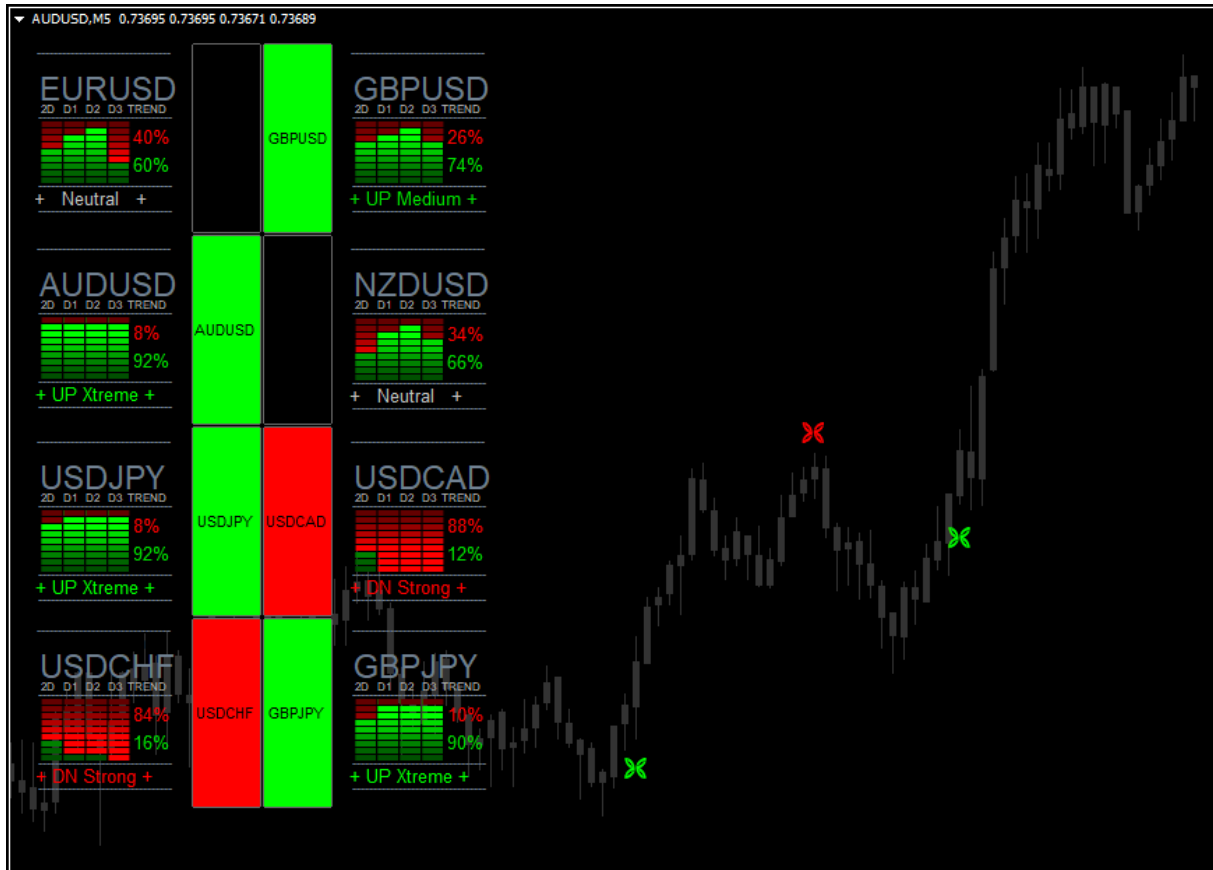

DOWN Strong – strong DOWN trend

DOWN Medium – medium DOWN trend

DOWN Weak – weak DOWN trend

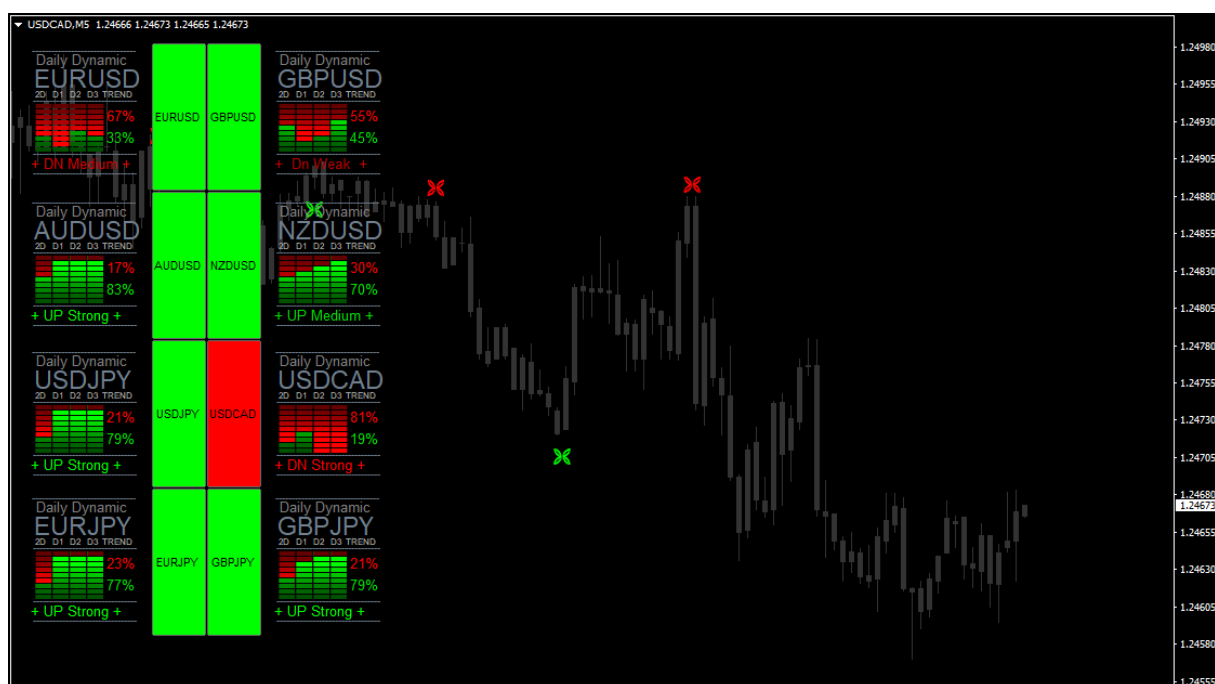

## ENTRY EXAMPLE BUY SIGNAL

We use both those elements to confirm the entry.

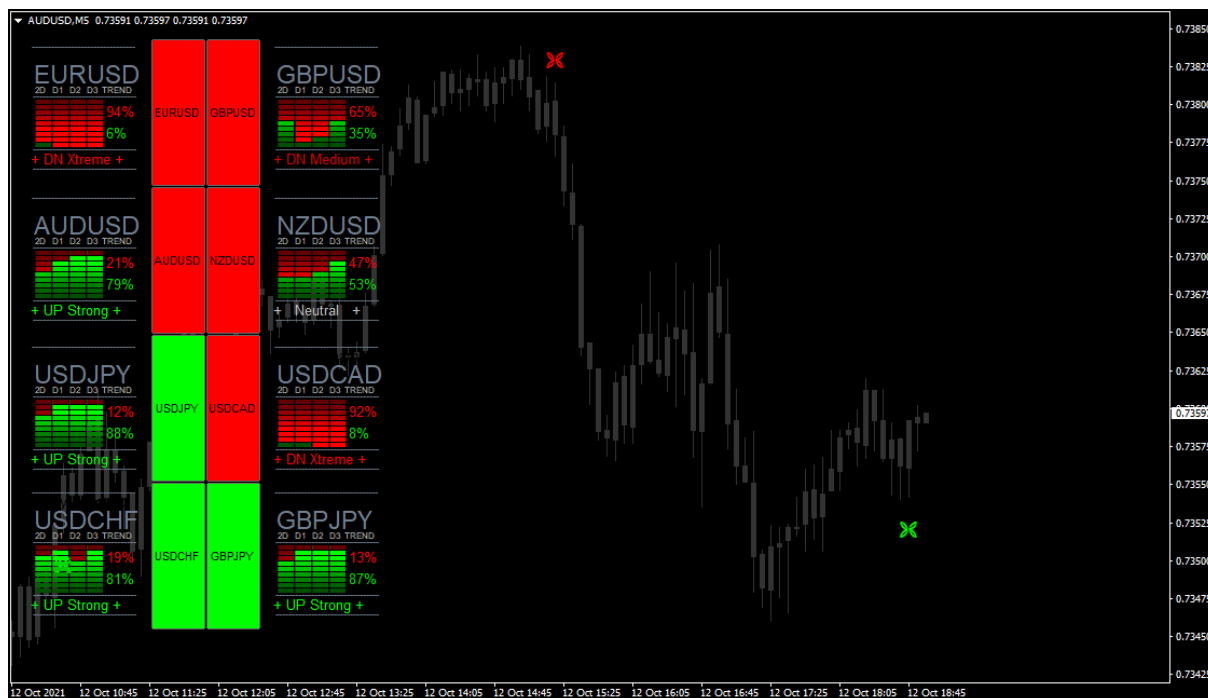

AUDUSD: TREND GREEN / MOMENTUM UP XTREME – Take next BUY signal.

## ENTRY EXAMPLE SELL SIGNAL

USDCAD: RED TREND/ MOMENTUM DOWN STRONG: Take next SELL signal.

## ENTRY EXAMPLE NO TRADE

AUDUSD: RED TREND/ MOMENTUM UP STRONG: NO TRADING!

It's possible that the core trend will be totally opposite to the pair dynamic, like on this example. The trend is clearly down, while pair got UP momentum. It may happen when market is making dynamic pullback. This is also the main reason why we use double confirmation tool. We go with the main trend with good momentum.

## MOMENTUM ANALYSIS

While reading the trend (core) values is easy, momentum gives more choices when taking a trade.

### Momentum values:

UP Extreme – very strong UP trend

UP Strong – strong UP trend

UP Medium – medium UP trend

UP Weak – weak UP trend

Neutral

DOWN Extreme – very strong DOWN trend

DOWN Strong – strong DOWN trend

DOWN Medium – medium DOWN trend

DOWN Weak – weak DOWN trend

For the best results, please use only those values:

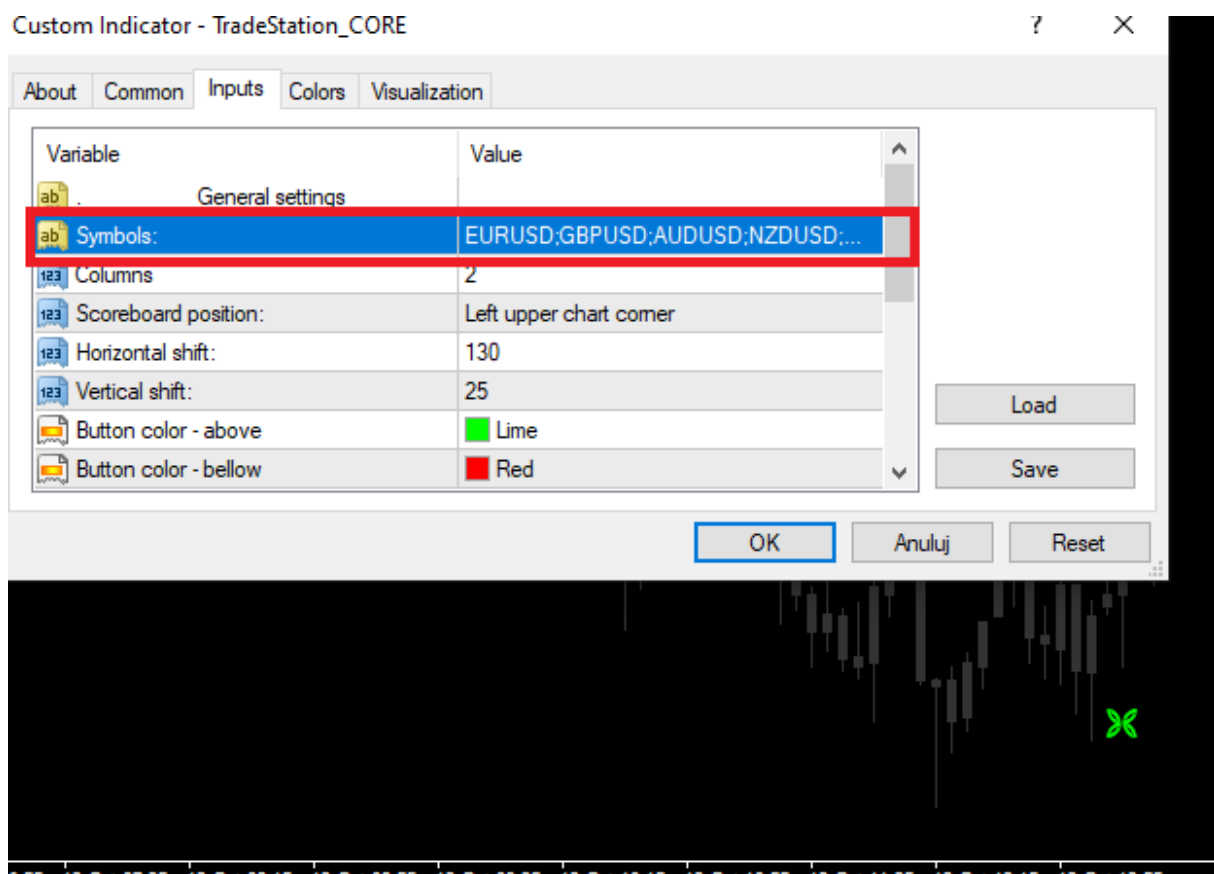

Extreme/Strong/Medium.

Weak and neutral means consolidation, so taking such trade can be more risky.

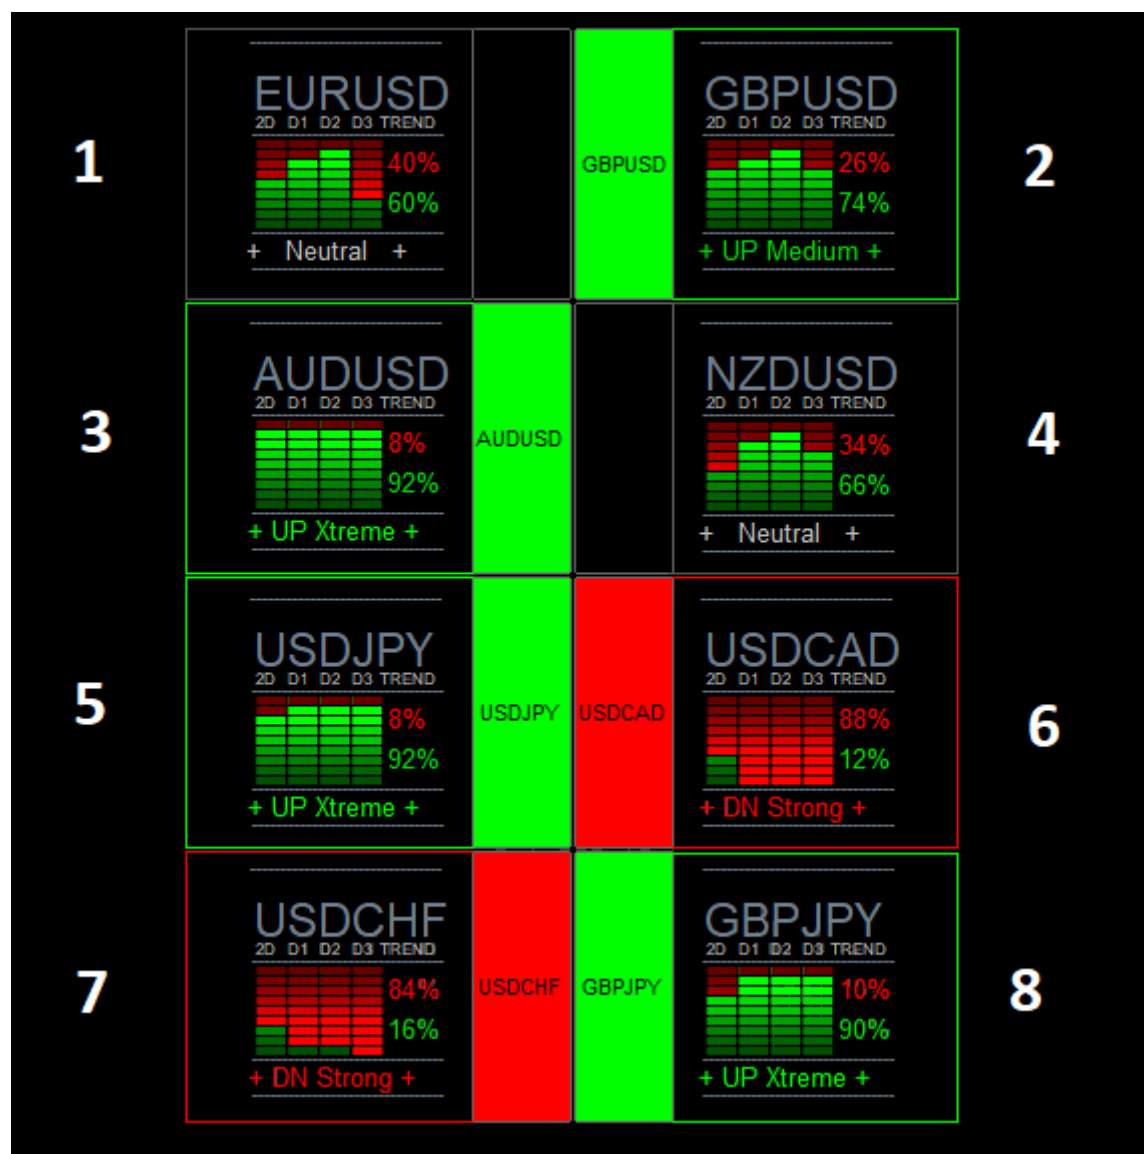

## CHANGING THE TRADING INSTRUMENTS

The software allows for tracing any trading instrument available in your MT4. By default it provides data for 8 major pairs, but you can of course change it as you like.

Get into FX TRADER CORE indicator settings and under inputs tab you will find the pair list. You can change those to any trading instruments you like.

After you change the CORE settings, you need to get into pair dynamic section. The software provides 8 x pair dynamic indicators that numbers are sorted as follows:

Let say you want to switch from AUDUSD and GBPJPY to XAUUSD and BTCUSD.

Just get into CORE indicator settings and change the old pairs to the new one. Then get into Currency Dynamic 3 and Currency Dynamic 8 and put the new pairs under 'currency symbol'.
