

FX ARROW PRO MT4

System Manual

Risk warning

Before you begin trading on Real account please carefully consider your investment goals, risk and experience you have. It should be noted that Forex is a leverage based market. It should be remembered that leverage can work both in your advantage and disadvantage as well. Therefore there is high risk of losing a part or all of your financial input placed on your account and because of that you should remember to trade with the amount of money which you can lose without taking any influential financial damage.

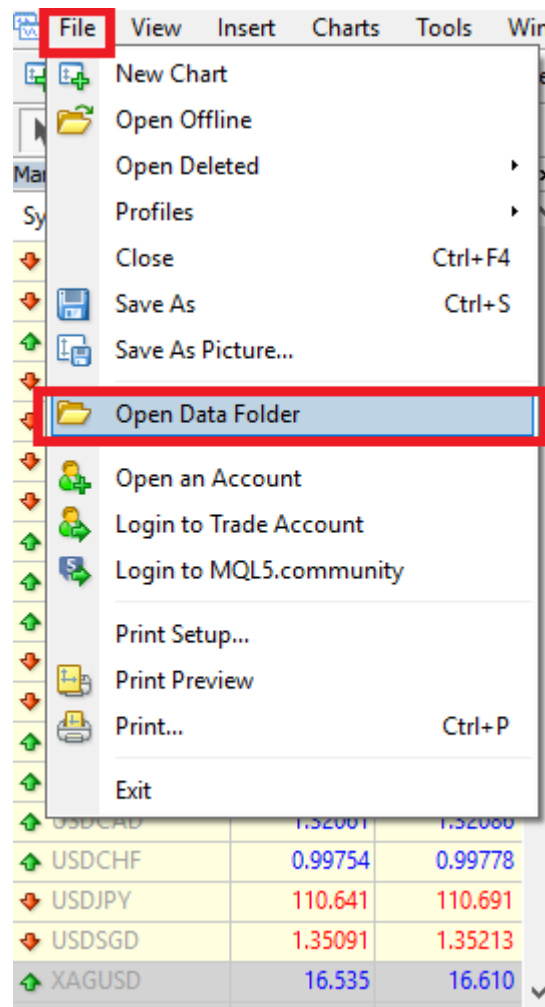

Disclaimer Signals generated by the system are not investment recommendations. - Restart your MT4, open your favourite chart. Press the right mouse button and pick template:

- **FX ARROW Lighting Scalping** – the fastest signals with also the highest risk to reward potential

- **FX ARROW Swift Scalping** – fast signals dedicated for scalping and fast daytrading

- **FX ARROW Turbo Daytrading** – the most conservative signals for daytrading

- **FX ARROW (LW)** – light weight templates.

TIP: Software is using advanced graphics display. In case if you notice any slower platform performance on your PC, please consider using 'light weight' template. It provides the same signals and data analysis with a bit simplified graphic display.

Welcome to FX ARROW PRO!

Thank you for choosing FX ARROW PRO.

FX ARROW PRO is an advanced trading system developed for MetaTrader 4 (MT4) and MetaTrader 5 (MT5), designed to help traders identify high-probability market opportunities through intelligent non-repaint BUY & SELL signals, multi-timeframe analysis, and real-time market monitoring.

The software is suitable for traders of all experience levels and can be used across all major financial markets, including Forex, Metals, Indices, Commodities, Cryptocurrencies, and Stocks offered by your broker.

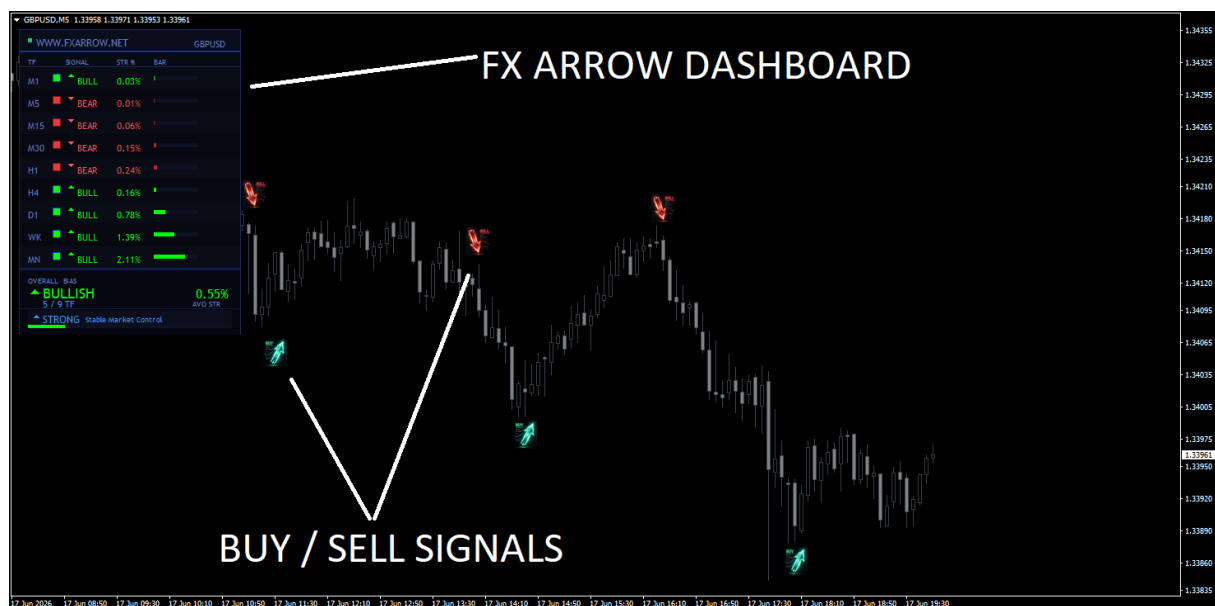

By combining advanced market analysis with a user-friendly dashboard, FX ARROW PRO helps traders make faster, more informed trading decisions while reducing the need for complex chart analysis.

System Overview

FX ARROW PRO combines powerful analytical components into one complete trading solution.

The software continuously scans market conditions, evaluates trend direction and momentum, and delivers actionable BUY and SELL signals directly on your chart.

Designed for simplicity and efficiency, FX ARROW PRO helps traders focus on potential opportunities without cluttering their charts with multiple indicators.

Using Signals with the Dashboard

For the best trading experience, FX ARROW PRO signals should always be evaluated alongside the Multi-Timeframe Dashboard.

While the BUY and SELL arrows identify potential trading opportunities, the dashboard provides the broader market context by analyzing trend direction and sentiment across nine different timeframes. This additional confirmation can help traders filter lower-quality setups and focus on opportunities that align with the overall market direction.

As a general guideline:

- ✓ Consider BUY signals when the dashboard shows predominantly bullish market conditions.
- ✓ Consider SELL signals when the dashboard shows predominantly bearish market conditions.
- ✓ Give greater attention to signals that are supported by multiple aligned timeframes.

When both the signal and dashboard point in the same direction, it indicates stronger market agreement and may increase confidence in the trading setup.

Signals that appear against the dominant dashboard direction should be treated with additional caution, as they may represent temporary pullbacks, short-term corrections, or weaker market conditions.

By combining signal arrows with multi-timeframe dashboard confirmation, traders can develop a more disciplined approach to market analysis and focus on opportunities that demonstrate stronger overall market alignment.

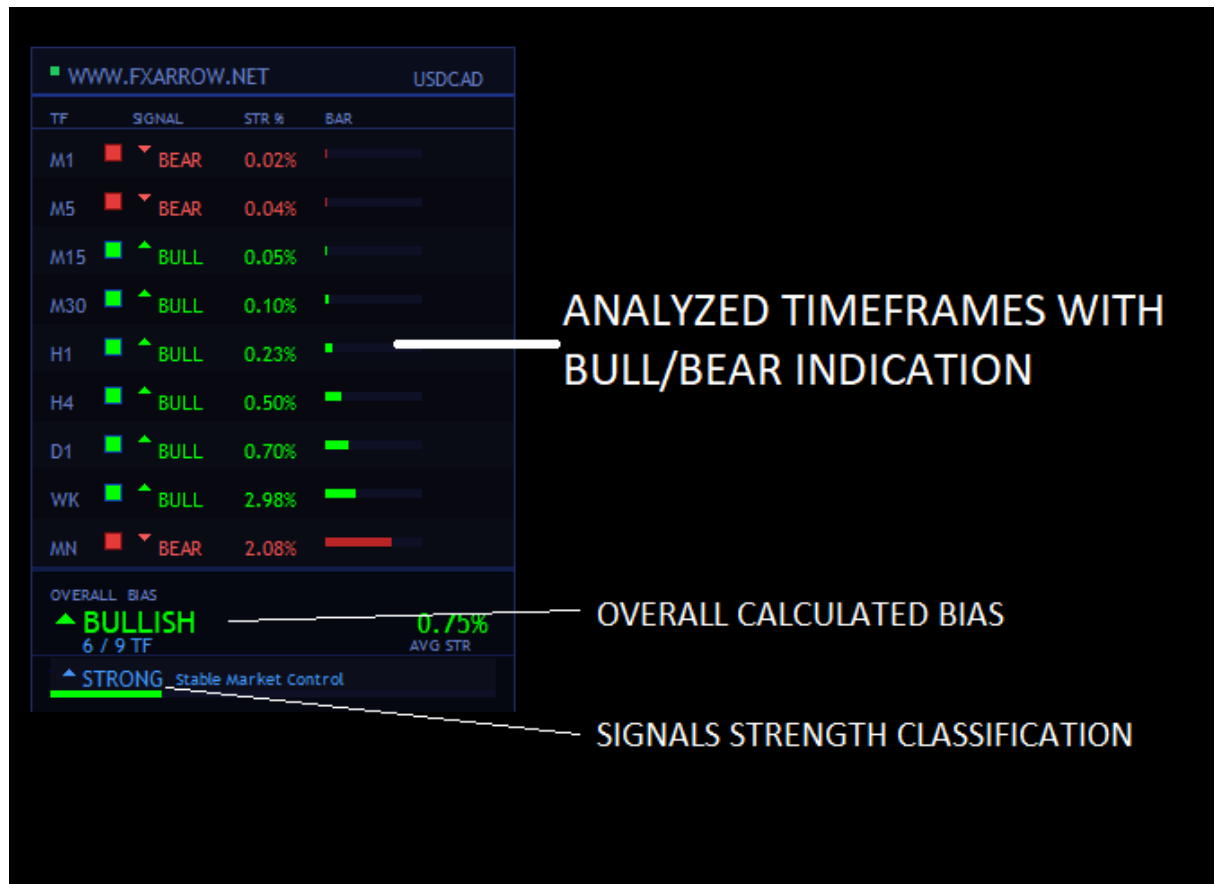

Simple Rule

BUY Signal + Bullish Dashboard = Preferred Setup

SELL Signal + Bearish Dashboard = Preferred Setup

The strongest opportunities often occur when the signal direction and the majority of dashboard timeframes are aligned.

Advanced 9-Timeframe Dashboard

One of the most powerful features of FX ARROW PRO is its intelligent multi-timeframe dashboard.

The dashboard continuously analyzes market conditions across nine separate timeframes:

- M1 (1 Minute)
- M5 (5 Minutes)
- M15 (15 Minutes)
- M30 (30 Minutes)
- H1 (1 Hour)
- H4 (4 Hours)
- D1 (Daily)
- W1 (Weekly)
- Monthly (MN)

This comprehensive approach allows traders to instantly evaluate market sentiment and determine whether short-term movements align with larger market trends.

Rather than manually switching between charts, all critical market information is presented in a single easy-to-read dashboard.

Signal Strength Classification

FX ARROW PRO evaluates every trading opportunity and classifies signals according to their overall level of market confirmation.

WEAK

WEAK signals represent early market opportunities with limited confirmation.

These signals may indicate the beginning of a developing move but generally require additional attention and analysis.

STRONG

STRONG signals indicate stronger alignment between trend direction, momentum, and market conditions.

These setups often provide a balance between early entry opportunities and market confirmation.

ULTRA

ULTRA signals represent the highest level of confidence within the FX ARROW PRO algorithm.

These opportunities typically occur when multiple timeframes and market factors align in the same direction.

Many traders use STRONG signals as their primary focus when searching for high-probability setups.

Three Trading Modes

Financial markets are dynamic and different trading styles require different analytical approaches.

For this reason, FX ARROW PRO includes three specialized trading modes.

Lightning Scalping Mode

Lightning Scalping Mode is optimized for traders seeking fast market opportunities.

This mode is designed to identify short-term momentum shifts and rapid market movements, making it suitable for lower timeframe trading and active scalping strategies.

Recommended for:

- Fast-moving markets
- Scalping strategies
- Active traders
- Lower timeframe analysis

Swift Scalping Mode

Swift Scalping Mode offers a balanced combination of speed and confirmation.

This mode applies additional filtering to market conditions while maintaining responsiveness to new opportunities.

Recommended for:

- Intraday traders
- Balanced trading approaches
- Traders seeking additional confirmation

Turbo Day Trading Mode

Turbo Day Trading Mode focuses on larger market movements and stronger trend development.

This mode places greater emphasis on trend quality and multi-timeframe agreement to help identify significant market opportunities.

Recommended for:

- Day traders
- Swing traders
- Trend-following strategies
- Higher timeframe analysis

Compatible Markets

FX ARROW PRO is designed to work on virtually any instrument available within the MT4 or MT5 platform.

Supported markets include:

- Forex Pairs
 - Gold
 - Silver
- Commodities
- Stock Indices
- Cryptocurrencies
- Individual Stocks

This flexibility allows traders to apply the same analysis framework across multiple asset classes.

Recommended Usage

For best results, traders should:

- ✓ Focus on signals that align with the higher timeframe trend.
- ✓ Give additional consideration to WEAK and STRONG signal classifications.
- ✓ Use the dashboard to confirm overall market sentiment before entering trades.
- ✓ Select the trading mode that best matches current market conditions.
- ✓ Apply proper risk management to every trade.
- ✓ Never risk more capital than you can comfortably afford to lose.

Risk Disclaimer

Trading Forex, CFDs, Commodities, Indices, Cryptocurrencies, and Stocks involves substantial risk and may not be suitable for all investors.

FX ARROW PRO is an analytical trading tool and does not guarantee profits or prevent losses. Past performance does not guarantee future results.

Always use appropriate risk management and trade responsibly.
